CITATION REPORT – 1 February 2026

FARYAL IQBAL

Ms. Faryal Iqbal is the Research Manager at Burjeel Cancer Institute, Burjeel Medical City in Abu Dhabi, UAE. She earned her undergraduate degree in Molecular Biology & Biotechnology, followed by a postgraduate qualification in Molecular Genetics in Pakistan, where her thesis explored the association between XRCC1 gene polymorphism and radiation exposure in healthcare workers. At Burjeel Cancer Institute, she is deeply involved in shaping the institute's research landscape. Her role extends beyond managing data and coordinating clinical studies; she mentors medical interns, supports scientific writing, and contributes significantly to the academic and editorial aspects of cancer research.

She is the co-editor of Cancer in the Arab World, the first comprehensive book covering cancer care across all Arab countries. The book has resonated widely across the region and beyond, gathering over half a million downloads within just two years. She has authored numerous peer-reviewed publications and contributed to at least ten book chapters, with her research interests rooted in oncology, hematology, and genetics.

In recognition of her growing contributions to the field, she was honored with the "EOS Research Award" by the Emirates Oncology Society in September 2023, an accolade that reflects both her professional excellence and her passion for advancing cancer research in the region.
