TO WHOM IT MAY CONCERN

Hassan Tahir is a Structural Engineer and Head of Structural Department with five years of professional experience in structural design, seismic evaluation, and retrofit of buildings and infrastructure projects. He has contributed to approximately 50 structural design and project coordination assignments across residential, institutional, industrial, healthcare, and specialized facilities, delivering reliable and performance-focused engineering solutions.

He currently leads a structural engineering team and is responsible for technical oversight, multidisciplinary coordination, design review, and quality-controlled project delivery. His project portfolio includes structural evaluation and safety assessment of public-sector buildings, hospitals, and institutional facilities, independent technical vetting of major government buildings, multi-story building performance evaluations, regional hazard assessment studies, and design and evaluation of high-rise and complex residential structures. He has supported large multi-project development programs and high-value infrastructure portfolios through coordinated engineering design efforts.

In addition to project delivery, he has contributed to professional knowledge and capacity building through published technical research, preparation of professional guidance material for practicing engineers, internal technical training programs, and mentoring of university interns and junior engineers. His professional contributions have been recognized through formal appreciation letters from client and institutional organizations. Through technical leadership, knowledge sharing, and public-safety-oriented engineering practice, he continues to make a strong professional impact in the structural engineering field.
