University Ranking

Share Our Pride

The Hong Kong Polytechnic University (PolyU) is a world leading university with world-class research in multiple disciplines, making bold advances to break new ground.

At PolyU, we nurture bright young minds to become leaders of tomorrow. Our researchers uncover knowledge and transform research excellence into impactful innovation through multi-disciplinary collaborations.

With over 88 years of proud tradition, PolyU ranks among the world's top 100 institutions. Twenty-six disciplines are ranked among the world's top 100 in the QS World University Rankings by Subject 2025.

PolyU is a home for educating thinkers, communicators and discoverers to make changes for a better world. Going forward, PolyU will continue its pursuit of excellence and impact through its education and research endeavours, strengthening its position as a world leading university, while making significant contributions to Hong Kong, the nation and the world.

QS World University Rankings by Subject

In the QS World University Rankings by Subject 2025, PolyU has achieved commendable results, with 7 subjects in global top 30 and 26 subjects ranked among the world's top 100.

The results testify to PolyU's academic excellence as a world leader in a number of subjects. The University will further develop its reputation as a university that excels in education, research and innovation, making even greater contributions for the well-being of society.

VIEW PROPOSAL RESULT

Funding Scheme :	General Research Fund (GRF)
Project Number :	15306224
Exercise Year :	2024 / 25
Project Title :	Harnessing the potential of Blue Carbon Ecosystems over the Guangdong-Hong Kong-Macao Greater Bay Area (GBA)
PI Name :	Dr NAZEER, Majid
Institution :	The Hong Kong Polytechnic University
Project Fund :	$1,134,931 (including earmarked item: $12,500 for Undergraduate Student)
Result :	4.5 (Detailed description)
Approved Project duration :	36 months
Notes for the Applicants :	RGC's policy on providing feedback to applicants

View Comments Return

Point	Detailed Description
5	Outstanding and internationally excellent. Provides full and strong evidence and justification for the proposal. **Should be accorded the highest priority for funding.**
4.5	Demonstrates very high international standards. Provides strong evidence and justification for the proposal. **Should be funded as a matter of priority.**
4	Demonstrates high international standards and provides good evidence and justification for the proposal. **Worthy of consideration of funding.**
3.5	Demonstrates good international standards but **in a competitive context, it is not of sufficient priority to recommend for funding.**
3	Has adequate qualities but is not internationally competitive. **Not recommended for funding.**
2	Has some strengths and innovative ideas but also has major weaknesses and flaws. **Not recommended for funding.**
1	Has numerous and significant weaknesses and flaws. **Not recommended for funding.**

Research Grants Council announces funding results of General Research Fund and Early Career Scheme 2024/25
****

The following is issued on behalf of the University Grants Committee:

The Research Grants Council (RGC) today (June 27) announced the funding results of the General Research Fund (GRF) and the Early Career Scheme (ECS) for 2024/25. Altogether, 1 255 successful proposals were granted funding totalling $1.1 billion.

In this round of exercise, the RGC received 3 533 GRF and 634 ECS applications from academic staff of the eight universities funded by the University Grants Committee. This represents an increase of 10 per cent and 21 per cent respectively as compared with that of last round.

After rigorous international peer reviews, 1 046 GRF projects were approved with a total funding of around $980 million, which compares with that of last year, with an overall success rate of about 30 per cent. The funded proposals cover all the disciplines of business studies, biology and medicine, engineering, humanities and social sciences, and physical sciences.

Moreover, the RGC also decided to fund 209 ECS projects with a total amount of around $140 million. This represents an increase of 12 per cent in terms of the number of projects funded, with an overall success rate of about 33 per cent.

The RGC Subject Panels commended the marked improvement in the overall quality of research proposals submitted under the GRF and ECS in recent years, including the originality of the proposals as well as the innovative methodologies that they put forward to tackle research questions. The research outcomes will support further development in various research fields.

The Chairman of the RGC, Professor Timothy W. Tong said, "It is heartening to see the enthusiasm of the Hong Kong research community in taking forward individual exploratory research as evidenced by the significant increase in the number of applications and the outstanding research quality in this round of exercise.

"The RGC endeavours to propel the growth of the thriving Hong Kong research ecosystem by administering different individual and collaborative research funding schemes. Amongst them, the GRF and ECS, which support all research disciplines for individual researchers, are instrumental in the Council's mission to develop a robust research base for maintaining academic vigour and catering to the needs of Hong Kong."

The RGC has stepped up efforts in recent years in supporting early-stage researchers in Hong Kong to further bolster Hong Kong's capacity as a world-leading education and innovation hub. Professor Tong said that it was encouraging to see an increased number of proposals funded under the ECS this year. The RGC looks forward to remarkable research outcomes from these talented individuals.

The GRF and the ECS are individual research funding schemes under the RGC. The GRF supplements universities' own research support for researchers who have achieved or have the potential to achieve excellence. The ECS aims to nurture junior academics and prepare them for a career in education and research. Following international practice, the RGC has adopted a peer-review mechanism to assess research proposals primarily based on academic quality and merit.

The 2024/25 funding results of the GRF and the ECS are available on the RGC website (GRF: ugc.edu.hk/eng/rgc/funding_opport/grf/funded_research.html; ECS: ugc.edu.hk/eng/rgc/funding_opport/ecs/funded_research.html).

2018 OUTSTANDING REVIEWER AWARDS

WINNERS

Dear Colleagues,

The *Remote Sensing* Editorial Board and Editorial Team would like to gratefully acknowledge the time and energy given by reviewers in checking manuscripts submitted to *Remote Sensing*. It is due to their efforts that the high quality of the journal and quick turnaround is maintained.

The following referees have been selected to receive "*Remote Sensing* 2018 Outstanding Reviewer Awards" for the quantity, timeliness and quality of their reviews in 2018:

The top five winners:

Mahyar Aboutalebi
Utah Water Research Laboratory, Utah State University, Logan, UT 84321, USA.

Stefania Bonafoni
Department of Engineering, University of Perugia, 06125, Perugia, Italy.

Christopher E. Sioris
Environment and Climate Change Canada, Toronto, Ontario, M3H 5T4, Canada.

Matthieu Molinier
VTT Technical Research Centre of Finland Ltd., PL 1000, FI-02044 VTT, Finland.

Chiman Kwan
Signal Processing, Inc., Rockville, Maryland, MD 20850, USA.

A further five winners:

Andrea Buono
Engineering Department, University of Naples "Parthenope", 80100 Napoli, Italy.

Majid Nazeer
COMSATS University Islamabad (CUI), Islamabad 45550, Pakistan.

Antonio Miguel Ruiz-Armenteros
Departamento de Ingeniería Cartográfica, Universidad de Jaén, 23071 Jaén, Spain.

John C. Trinder
School of Civil and Environmental Engineering, The University of New South Wales, Sydney, NSW 2052, Australia.

Nasser Najibi
The City University of New York, New York, NY 10031, USA.
