NATIONAL FLOOD RESPONSE COORDINATION CENTRE

APPRECIATION LETTER

TO: **Mr. Shahzada Adnan**

National Flood Response Coordination Centre **(NFRCC)** would like to thank you and place on record its very sincere appreciation for your **contributions for the national effort against Flood**. Amid devastating conditions in most parts of the country; **NFRCC role remained vital and fundamental** to synergize flood relief efforts across the country during rescue, relief and rehabilitation/ reconstruction phases in Pakistan.

NFRCC is grateful to you for the **continuous commitment, dedication and hard work** displayed during **Nation's resolve** against the unprecedented nature of flood. We would like to congratulate you and extend our sincere gratitude and appreciation for your enthusiasm and dedication to the national cause.

Ahsan Iqbal
Deputy Chairman NFRCC
(Minister of Planning, Development, and Special Initiatives)

Lieutenant General
Muhammad Zafar Iqbal, HI(M)
National Coordinator
NFRCC

Islamabad

Handing Over IT Equipment to PMD

Regarding the Letter of Cooperation between Welthungerhilfe and the Pakistan Meteorological Department, Welthungerhilfe by the funding of the German Federal Foreign Office (GFFO) is delighted to hand over IT equipment to the Pakistan Meteorological Department. This initiative is part of our efforts to strengthen the department's capacity through IT systems upgrades.

The equipment we are handing over today includes (the attached list). These resources have been jointly selected by Welthungerhilfe and PMD to match the goals of enhancing the department's abilities in weather forecasting, data analysis, and dissemination.

We firmly believe that these IT resources will greatly improve the efficiency and effectiveness of the department's operations, enabling better tracking and prediction of weather patterns. This will help in making informed decisions and preparing for Anticipatory Actions for Multi-Hazards.

Moreover, this initiative demonstrates our dedication to supporting the Pakistan Meteorological Department in its vision to provide reliable and timely weather information for the welfare of the nation.

We are hopeful that the use of these IT resources will result in noticeable improvements in the department's operations, ultimately benefiting the communities and stakeholders served by the Pakistan Meteorological Department.

Ownership of these equipment will be with PMD and PMD is entitled to directly claim warranty for these equipment from Onway Technology, the supplier. Onway Technology is obligated to address any queries or concerns regarding the warranty of the equipment, ensuring seamless resolution and support for PMD.

Subject: Letter of Appreciation

On behalf of Concern Worldwide, we are incredibly grateful for the exceptional dedication and remarkable contributions of Dr. Shahzada Adnan in fostering collaborations between the public and private sectors, especially in disaster preparedness and forecasting.

Dr. Shahzada Adnan's visionary leadership and tireless efforts have significantly bolstered the capabilities of the Pakistan Meteorological Department (PMD) through the development of tailored forecast and early warning systems for all climate extreme events. Concern Worldwide provides in-kind support to PMD valued at approximately PKR 5,562,568. The tailored forecast information will be provided to Concern Worldwide to strengthen anticipatory actions and response times proactively. Similarly, automated models for tailoring forecasts of heatwaves, droughts, and floods will be developed for localized Early Warning Systems within PMD, laying a solid foundation for anticipatory actions and development. Concern Worldwide will provide technical assistance to PMD valued at about PKR 9,734,494.

The incorporation of this advanced technology will empower PMD to predict and mitigate impending hazards such as floods, heatwaves, and droughts with increased accuracy and effectiveness. Dr. Shahzada Adnan's expertise and unwavering commitment have not only enhanced PMD's operational capabilities but have also been instrumental in bolstering the resilience of communities throughout Pakistan.

His dedication to advancing meteorological science and disaster management is truly commendable and serves as an inspiration to all those working towards a safer and more sustainable future.

We extend our deepest appreciation to Dr. Shahzada Adnan for his invaluable contributions and eagerly anticipate further collaboration in our joint efforts to create a more resilient and food-secure Pakistan.

Thanks and regards,

Syed Sulaiman Shah

Partnership with PMD on Anticipatory Action work

1 message

Iqbal, Naeem (FAOPK) <Naeem.Iqbal@fao.org> Fri, May 10, 2024 at 2:11 PM
To: "shaz.adnan@gmail.com" <shaz.adnan@gmail.com>

Dear Sir,

The Food and Agriculture Organization of the United Nations (FAO), with support from the European Commission's Civil Protection and Humanitarian Aid Operations (ECHO), implemented a crucial project in Asia-Pacific. This project aimed to enhance capacities and understanding of Anticipatory Actions (AA) for drought and flood preparedness, mainly through Social Protection systems. It encompassed five countries: Pakistan, Bangladesh, the Philippines, Lao PDR, and Viet Nam.

Dr. Shahzada Adnan, Deputy Director of the Pakistan Meteorological Department (PMD), collaborated with the UNFAO team to finalize vital protocols for drought and flood triggers and thresholds. These protocols are essential for implementing Anticipatory Actions (AA) and Early Warning Indicators (EWI) for drought and flood preparedness.

In Pakistan, the UNFAO initiative has had a profound impact, particularly in the province of Sindh. It has played a pivotal role in enhancing the provincial government's multi-hazard Anticipatory Action Protocols (AAP). Originally designed for the Umerkot, Dadu, and Tharparkar districts, these protocols are now poised for a wider implementation, encompassing other districts within Sindh. This successful initiative is a testament to FAO's mission to fortify agricultural and food systems, ensuring they are both risk-informed and sustainably productive.

FAO Pakistan extends its heartfelt gratitude to Dr Shahzada Adnan for his unwavering dedication to developing and finalizing the drought and floods Early Warning Indicators and AA protocols. We look forward to future collaborations with PMD to further strengthen Pakistan's drought and flood early warning system, a crucial step in safeguarding food security and livelihoods.

Kind regards,

Naeem

To: Shahzada Adnan <shaz.adnan@gmail.com>

Dear Dr. Shahzadan Adnan

Editorial member, International Journal of Environment (IJE), Nepal

https://www.nepjol.info/index.php/IJE/index

Greetings

This is to inform you that you served the journal voluntarily as an editorial board member for >5 years. As per the policy of the journal and publisher, the maximum duration for the position is only 4 years. We thank you for all your support, help and cooperation for bringing the journal to this height. During the period you served the academia with your full dedication, commitment, and diligence while reviewing articles submitted to IJE. Please accept this as a formal acknowledgement.

As the duration has already been completed, your support till today is highly appreciable. We have no policy to produce official letters for the services delivered.

Your details from the IJE page (https://www.nepjol.info/index.php/IJE/about/editorialTeam) will be removed within a week, please update your CV (if necessary).

Thank you for your understanding.

Dr. MUHAMMAD AFZAAL
Publication Coordinator, IJE Department
Islamabad

Letter of Appreciation

I express my immense pleasure to congratulate you on publication of your paper in International Journal. It exhibits your hard work, dedication and positive attitude towards profession. These laurels, which you have achieved in early years of service, are commendable and praiseworthy. Your achievements are exemplary and it is hoped that you will continue to work hard with the same zeal and enthusiasm in future too.
