Muhammad Shahryar Malik

SUMMARY

Muhammad Shahryar Malik is a seasoned professional with five years of industry experience, specializing in User Experience (UX) and User Interface (UI) design. In addition to his proficiency in UX/UI, he possesses foundational expertise in web development and WordPress customization. He also has worked with both national and multinational organizations, leveraging his skills in design and human interaction to deliver impactful projects.

MOST RECENT EXPERIENCES

IT Officer (Present)

Ministry of National Health Services Regulations and Coordination,

- Managing IDSRs data management systems.
- Providing technical support to IDSR staff.
- Assisting with data analysis through IT tools.
- Maintaining IT infrastructure, including backups and security measures.
- Delivering technical training on IT systems and software.
- Collaborating with epidemiologists, NIH central IT, and external partners.
- Contributing to IT-related projects and procedures.

Web Designer

CEPTZ Canada UK | Remote (Present)

- Designed websites and interfaces for diverse projects, ensuring aesthetics aligned with audience engagement goals.
- Applied user-centric design principles to enhance usability and accessibility across multiple platforms.

Web Developer

National Institute of Health (NIH), Pakistan
Prime Minister Health Complex, Islamabad

- Renovated the NIH official website, increasing user engagement by 40% through enhanced usability and modern design.
- Designed intuitive interfaces for the IDSR platform, improving data collection for disease surveillance.
- Developed the NCRT platform with seamless navigation, streamlining research

processes.
- Created an interactive NIH COVID Learning Platform, boosting public health awareness.

Visual Communication Designer
1KeySolutionUK | Leicester, UK (Hybrid)

- Designed over 50 promotional materials, including brochures and flyers, increasing campaign effectiveness by 30%.
- Delivered branding solutions, helping launch and grow multiple e-commerce brands.

Alpha Base, CIE NUST | Islamabad, Pakistan

- Designed interfaces for web and Android applications, enhancing user experience for over 5,000 users.
- Developed blockchain application designs with a focus on security and user ease.

=

SOME SELECTED NATIONAL & INTERNATIONAL PROJECTS

1. **National Cancer Registry (NCRT) Pakistan Web App UX/UI**
   - Conducted extensive research and implemented high-end design with prototyping for the National Cancer Registry web application, ensuring intuitive user interfaces and seamless user interactions.

   - Collaborated closely with developers throughout the product development process to ensure the successful integration of design elements, resulting in a user-friendly and visually appealing final product.

2. **IDSR (Disease Surveillance System) Pakistan Web Portal**
   - Designed and developed the web application for the Infectious Disease Surveillance and Response (IDSR) system in Pakistan, focusing on user-centric design principles and efficient data visualization techniques to enhance usability and accessibility.

3. **Revamping of National Allergy Center Pakistan**
   - Spearheaded the comprehensive redesign efforts for the National Allergy Center in Pakistan, employing modern design aesthetics and user experience best practices to create a visually engaging and informative digital platform.

   - Conducted user testing and feedback sessions to iterate on design concepts and ensure alignment with the needs and preferences of the target audience, resulting in increased engagement and user satisfaction.

4. **National Institute of Health (NIH) Website Revamp and Content Enhancement**
   - Undertook the redesign and content enhancement of the National Institute of Health (NIH) website, implementing a user-centered design approach to improve overall usability and accessibility at the national level.

5. **Block chain Payment App Design**
   - Designed a modern, minimal interface for a block chain payment app, focusing on user-friendly payment experiences and iterative feedback.

6. **Android, Web & GSM-based Disaster Management System (SOS System)**
   - Developed a multi-level communication SOS system for disaster management, integrating Android and web applications along with GSM-based technologies to provide robust communication capabilities at both national and personal levels.

   - Implemented thorough development using HTML, CSS, PHP, JavaScript, and hardware modules connected via Arduino to ensure seamless integration and functionality.

ACADEMICS

- **MS(Computer Science)** **(Cont.)**
- **BS (Computer Engineering)** **2013- 2017**
  Comsats University Islamabad
- **Intermediate (Pre-Engineering)** **2011-2013**
  F.G Degree College for Men, Wah Cantt
- **Matric** **2009-2011**
  F.G Public School, Wah Cantt

TECHNICAL TRAININGS & WORKSHOPS ATTENDED

- **MERN Full Stack Development Certification**
  Learned to develop full-stack web applications using MongoDB, Express.js, React, and Node.js.
- **React Native Development Certification**
  Acquired skills to build efficient cross-platform mobile applications with React Native.
- **WordPress Website Development**
  Learned website creation, including theme installation and plugin configuration, using WordPress.
- **Robotics Programming, Android App Development**
  Acquired skills in robotics design, programming, and developing Android applications.
- **Certified Training on Raspberry Pi**
  Obtained certification in utilizing Raspberry Pi for various projects and applications
- **PCB Design and Fabrication Workshop**
  Mastered the process of designing and fabricating printed circuit boards.
- **Creative Design Certification**
  Acquired certification from PITB, a project of the Punjab Government, showcasing proficiency in creative design skills.

PROFESSIONAL & SOFTSKILLS TRAININGS ATTENDED

- **Tech in Pakistan** (Conference)
  Event aimed at empowering technologists, gaining insights into the latest trends and fostering professional growth within the tech community
- **Strategic vision** (Timelenders)
  Explored personal and professional vision setting, including family, studies,

and financial aspirations.

- **MBTI Personality Assessment** (IRRC)

  Covered personality traits assessment to enhance self-awareness and understanding of others' personalities.

- **Strategic time Management** (Positive Solutions)

  Learned about time cycles and quarters, as well as psychological time management techniques.
