This citation is presented in recognition of the exceptional leadership, innovation, and national service of **Mr. Muhammad Iqbal, Chief Executive Officer (CEO) of Alison Energy and Vice Chairman of the Pakistan Alternative Energy Association (PAEA).** Belong to skardu (Gilgit Baltistan)

**Mr. Muhammad Iqbal** is a distinguished energy professional and a recognized energy media expert, regularly contributing to national television to promote awareness of renewable energy, climate resilience, and sustainable development in Pakistan. His work reflects a deep commitment to clean energy transition, particularly in climate-vulnerable and glacier-rich regions of Gilgit-Baltistan.

He has played a pioneering role in introducing lift-based and smart irrigation systems within the government sector and in collaboration with international NGOs, significantly improving water efficiency and agricultural productivity in mountainous terrains. Notably, he introduced the first Ice Storage System in Gilgit-Baltistan, an innovative solution aimed at water conservation and climate adaptation in high-altitude regions.

Mr. Iqbal has actively contributed to climate change mitigation, successfully facilitating initiatives that have resulted in the reduction of over 1,000 tons of carbon emissions in glacier-rich areas, directly supporting water preservation and environmental sustainability. His efforts have strengthened community resilience while safeguarding fragile ecosystems.

As part of his international exposure and leadership development, Mr. Muhammad Iqbal traveled with a delegation of Pakistan's top 15 CEOs to China to explore advanced clean-energy and climate technologies, fostering cross-border knowledge exchange and innovation.

Beyond technical achievements, he remains deeply engaged in community development initiatives across Northern Gilgit-Baltistan, working closely with local communities to promote sustainable livelihoods, energy access, and environmental stewardship.

In recognition of his visionary leadership, pioneering contributions, and unwavering dedication to sustainable energy and climate action, this citation is awarded with highest appreciation and respect.

With sincere admiration and best wishes for his continued success and national service.
