PROFESSIONAL SUMMARY

Visionary cybersecurity executive with 10+ years of leadership experience, founding and scaling Prime Edge into a regional leader in digital security solutions, compliance consulting, and emerging technology integration Forward-thinking, multidisciplinary executive and business leader with 10+ years of experience spearheading operational and cultural transformations, maximizing bottom-line savings, and driving profitability.

CERTIFICATIONS

- Cloud Network Certified Engineer
- Scrum Fundamentals Certified
- Computer Hacking Forensic Investigator (CHFI)
- Certified Ethical Hacker (CEH)
- Project Manager Essential Certified
- AccessData Certified Examiner
- AccessData Certified Investigator
- Six Sigma White/ Yellow Belt
- Project Management Professional (PMP)

RESEARCH & BOOKS

- Nano Robotics: Next level of Military Technology. **IEEE**
- Military Operations: Wireless Sensor Network-based application to reinforce the future battlefield command system. **IEEE**
- Robotics: Biological Hyper-computation and Bio-Inspired Communication in SWARM intelligence – **IEEE**
- Defense in Depth Book – **National Book Foundation**
- Deep Web Book – **Taylor & Francis**
- Byte Guardians: A Cybersecurity Handbook – **Draft2Digital**
- Building Thriving Organizations Through Leadership – **Draft2Digital**

SKILLS

- Kaspersky Security Center/ Symantec Endpoint Protection Manager
- Policy Formulation and Document Management/ Control
- Business and System Analysis
- Operations and Administration Management
- Project Management
- Servers Management / Active Directory
- Digital Forensics (FTK, OSForensics)
- ISMS

EXPERIENCE

PRIME EDGE, CEO

September 2024 – PRESENT

Prime Edge is a leading cybersecurity and digital transformation company, Prime Edge specializes in delivering comprehensive cybersecurity services tailored for academic institutions, government entities, and enterprises across the Middle East.

- Founded and scaled Prime Edge into a leading cybersecurity solutions provider in Oman and the Middle East.
- Directed cybersecurity strategy, compliance (ISO 27001, GDPR, NIST), and managed service operations.
- Led large-scale cybersecurity deployments including SIEM, SOC, EDR, NGFW, and Cloud Security solutions.
- Built and mentored a team of internationally certified cybersecurity professionals.
- Established strategic partnerships with technology vendors and academic institutions.
- Delivered cybersecurity training programs for universities and public sector clients.
- Drove innovation by integrating AI and Blockchain technologies into cybersecurity services.

SAAZ ENTERPRISES, CTO

September 2022 – August 2024

SecurifyTech is a leading provider of IT infrastructure services, cyber security services, automation services, and training and certification services, with a commitment to delivering exceptional solutions that meet the unique needs of clients.

- **Drove digital transformation initiatives** by aligning IT strategies with business goals, resulting in improved operational efficiency and innovation.

- **Implemented advanced AI tools and business intelligence solutions** to optimize internal processes and enhance decision-making capabilities.
- **Led ERP transformation projects**, ensuring seamless integration and adoption of Oracle Fusion across the organization.
- **Ensured robust cybersecurity measures** by developing and enforcing IT governance frameworks, reducing vulnerabilities and enhancing data protection.
- **Built and led a high-performing IT team**, fostering a collaborative environment and achieving high levels of IT user satisfaction.
- **Managed organizational IT needs**, ensuring timely delivery of IT solutions and maintaining a high level of user satisfaction.
- **Implemented business intelligence tools** to drive data-driven decision-making and improve overall business performance.
- **Adapted to the rapidly changing digital landscape** by staying updated with the latest technologies and trends, ensuring the organization remained competitive.
- **Managed change effectively** by developing and executing change management strategies, ensuring smooth transitions during IT transformations.
- **Collaborated with cross-functional teams** to ensure IT initiatives supported business objectives and delivered measurable results.

Nayyar Technology, System Analyst

February 2022 – March 2023

At Nayyartech.ai, we provide cutting-edge cognitive AI solutions tailored for information-intensive domains such as healthcare, financial services, and public services, propelling businesses into the digital era.

- Collaborated with Business Analysts, Project Leads, and IT team to resolve issues and ensure viable and consistent solutions.
- Structured and prioritized business requirements and communicated plans for review and approval with stakeholders.
- Defined and coordinated the execution of testing procedures and developed test cases to serve the overall quality assurance process.
- Developed, analyzed, prioritized, and organized requirement specifications, data mapping, diagrams, and flowcharts for developers and testers.
- Coordinated with internal and external stakeholders to establish project scope, system goals, and requirements.
- Provided documentation of all processes and training as needed.

Pakistan Army, Information Security Officer

April 2013 – January 2022

Pakistan Army can act against cyber threats and vulnerabilities of the modern technology era. For this matter, they have a force of technical officers who can research and develop new products to strengthen the army's technology infrastructure.

- Information security system policies, plans, and baselines were developed and reviewed.
- Ensured cyber security policies were adhered to and required controls were implemented, facilitating a continuous monitoring system.
- Utilized a defense-in-depth approach and identified areas of potential weakness.
- Conducted IT audit assessments for systems or applications as required and recommended solutions to mitigate risk.
- Performed security assessment on the applications, websites, and web applications to determine the security posture.
- Ensured incident identification, assessment, quantification, reporting, communication, mitigation, and monitoring.
- Worked collaboratively with other cybersecurity teams and business units.
- Driven the implementation of emerging threat intelligence (IOCs, updated rules, etc.) to identify affected systems and the scope of the attack.
- Implemented standards and procedures to ensure alerts were addressed with relevancy, accuracy, and on time.
- Operated autonomously to investigate further and escalate following policies, procedures, and defined processes.

Swift Technology (UK), System Analyst

January 2011 – September 2012

Swift Technology Group is a technology-driven organization providing complete end-to-end product development.

- Implemented computer system requirements by defining and analyzing system problems; and designing and testing standards and solutions.
- Developed solutions by preparing and evaluating alternative workflow solutions.
- Developed, analyzed, prioritized, and organized requirement specifications, data mapping, diagrams, and flowcharts for developers and testers.
- Ensured operations by training client personnel; and providing support.

EDUCATION

University of Wales (UK), Master of Science (MS), Security Technology

2011 – 2012

COMSATS (Pak), Bachelor of Science (BSc), Computer Science

2005 – 2010
